

## Deck Features & Accessories

Finishing your deck with features such as railings stairs and lighting, will complement its appearance and safety. Here are some product categories to explore.

### Deck Railings

This is a safety must-have as well as a key design feature. Check local building codes or consult with a contractor about height, baluster spacing etc.

### Stairs

The height of your deck determines your stair options, from a basic wrap-around box step to a full stairway with landing. Check local building codes.

### Skirting

A skirting kit will bring a clean, finished look to your deck by camouflaging under-deck storage areas.

### Lighting

Ranging from string lights to pendants to rope lighting, lanterns and more, outdoor lighting enhances safety, utility and style. Eco choices include LED and solar lights.

### Safety Gates

Having a safety gate is a must for households with pets and/or small children. These gates come in removeable and permanently mounted styles, as well as in designs to suit your style.
